“REMOVING COMPLEXITY FROM INFRASTRUCTURE INVESTMENT”

IT INFRASTRUCTURE

GNS had an excellent record in helping customers to build and operate highly automated datacenter environment whether on-premises private cloud or public cloud IaaS. Built upon web-scale inspired hyper converged infrastructure, powerful self-service capabilities, efficient storage consolidation, and advanced IT operations – with a lower total cost of ownership, and no vendor lock-in (both software and hardware).

With Nutanix Private Cloud offering, GNS managed to help customers overcome challenges relating to managing infrastructure and help them maintain competitive edge in their respective names.

"IDENTIFY, DETECT, MITIGATE AND RESPOND TO CYBERATTACKS"

CYBER SECURITY

We actively assist our clients in getting the full support they need to identify, detect, mitigate and respond to cyberattacks before causing significant damages to their business. GNS provides contemporary end-to-end cyber security solutions to all business types.

At GNS, we are always scouting for new ways to deliver the best security solutions to help our clients attain their business goals while managing risks and keeping cyberattacks away. We are always on the lookout for up-to-date security tools to help our clients deal with the evolving scenarios of cyberattacks.

GNS Cyber Security solutions offer network protection, access management, data protection and management solutions. Our Cyber Security solutions help our clients to attain contextual and user-centric security solutions.

AUTOMATIONS

"Transformation requires an end-to-end mindset, a rethinking of ways to meet customer needs, seamless connection of work activities, and the ability to manage across silos." Harvard Business Review.

As GNS Automations we have embraced this mindset. We enable businesses to achieve their digital transformation goals using our focused portfolio of business applications, technology, and services. We provide consultancy, implementation and support expertise in Enterprise Resource Planning (ERP), Intelligent Document Processing, Robotic Process Automation (RPA) and Artificial Intelligence (AI).
